

2023 Corn Replant Policy

Resor Seeds will provide the following corn hybrids for replanting at no cost, at the growers discretion, provided we are notified in advance when a grower suspects a replant situation and we have the opportunity to visit the field before it is prepared for replanting:

| Original Corn Planting | Free Replant options |
|-------------------------------|-------------------------------------|
| Conventional/NonGMO | 6778,6854,6959,8015,8404,*6506HX1 |
| AgriSure 3220 trait | 8251 AS3220, 79P72 AS3330 |
| VT2P, Trecepta Traits | 6872VT2P, 79P49VT2P, 81P88 Trecepta |

We may not visit the field but want the opportunity to do so.

The one exception to our replant policy is if the field needed replanted due to a **widespread, late spring freeze or frost event**. If such an event were to impact millions of acres we would not have the financial means to provide the replant for all of our acres, and we could not access enough seed anyway. _____

Our Elite hybrids 6893, 82P62, 8360, 85P34 and 86P23 cannot be used for free replant. If supply of these hybrids are available, and grower wants to use one of these products for replant. They will be invoiced at 50% of retail price.

2023 Soybean Replant Policy

Resor Seeds will provide soybeans for replanting at no cost, at the growers discretion, provided we are notified in advance when a grower suspects a replant situation and we have the opportunity to visit the field before it is prepared for replanting. The original soybeans must have been treated with a fungicide by Resor Seeds or ProHarvest. Free replant is limited to 80 units or 25% of the seed units originally purchased, whichever is greater. Replant needs over 25% will be invoiced at 33% of retail price.

If the grower elected to plant untreated seed, replacement replant seed will be invoiced at 33% of retail price.

The one exception to our replant policy is if the field needed replanted due to a **widespread, late spring freeze or frost event**. If such an event were to impact millions of acres we would not have the financial means to provide the replant for all of our acres, and we could not access enough seed anyway _____

I have read, understand, and accept the terms of Resor Seeds 2023 replant Policy.
