

## Moly Dry Seed Treatment—Tom Head

### Objective:

Compare Moly Dry, a nutritional planter box seed treatment from Rocket Seeds to grower standard practice (GSP) which was Protect Ultra treatment with 80/20 talc.

### Trial Details:

**Grower:** Tom Head

**Location:** Sullivan County, MO

**Hybrid:** Apex 3900 Enlist Soybeans

**Planting Date:** 5/6/2020

**Harvest Date:** 10/12/2020

**Data Source:** Average of three 8 row field length strips for each treatment

### About the Product:

Contains a nutrient formulation designed to help legumes withstand early season cold and water stress and improve nodulation and nitrogen efficiency.

Entry	Yield	Moisture
GSP	62.9	11.1
GSP + Moly Dry	60.8	11.0
