

2021 Replant Policy

Resor Seeds will provide seed for replanting at a reduced price, at the growers discretion, provided we are **notified in advance** when a grower suspects a replant situation and **we have the opportunity to visit the field before it is prepared for replanting**. We may not visit the field but want the opportunity to do so.

The one exception to our replant policy is if the field needed replanting due to widespread **frost or freeze damage**. If we were to have a wide spread freeze later in the season that destroyed millions of acres of crops we would not have the financial ability to handle that risk and it is unlikely we would be able to secure the necessary seed for replanting anyway.

Corn Replant

Original Hybrid Planted -81P88 trecepta, 8360VT2P, 8535VT2P

These are treated with Poncho 500 Vitivo and replanting cost will be 10% of list price.

All other Hybrids- 25% of list Price

Soybean Replant

Protect D treated Seed – 25% of List Price

Protect Ultra treated Seed – 10% of List Price
