ProHarvest 8478 is the best hybrid we have seen for southern rust. It is currently only offered as a Non-GMO option but a PowerCore Enlist option could be available in the future.

These ear leaf samples on the left were from a late planted plot in 2021 where Southern rust had an effect on the yield. The 3 leaves on the right were from 8478 which was by far the best rated for southern rust in the plot.
