Grey Leaf Spot	7
Seedling Vigor	7
Drought Tolerance	8
Test Weight	8

ProHarvest 8522 is a conventional hybrid we have been selling for five years and is best described as a full season hybrid without any weaknesses. The reason many of our customers are unfamiliar with 8522 is there was never a VT2P version of this genetics.

8522 did very well in our plots this year, at our warehouse plot it outyielded 6 of the 10 traited hybrids and all the NonGMO hybrids except 8478 and 8360. In our NonGMO research plot at Mooresville 8522 was 7th out of 16 commercial and experimental Non-GMO hybrids.

We have supply in both NonGMO and Conventional, the NonGMO has a lower level of GMO contamination that meets the purity standards of Ingredion.
